Sprint Retrospective Report

Project Overview:

- **System Functionality:** Following discussions with Dr. Ahmad, the system was developed to meet the expected functionality. Dr. Ahmad inquired about the possibility of a task search functionality, to which I responded that it was intentionally excluded from this sprint.

- **Team Work:** This project was undertaken as an individual effort.

Sprint Details:

- **Primary Objective:** The primary goal of this sprint was to deliver a fully functional system that aligns with the project's requirements.

- **Sprint Duration:** The sprint spanned a period of 14 days.

- **Achievements:** The tasks completed during this sprint have been comprehensively documented in the user story map, providing a visual representation of the work accomplished.

- **Challenges Encountered:** Challenges included managing academic commitments, such as exams and assignments, alongside project development. Additionally, a lack of motivated team members impacted the project's timeline, leading me to seek external assistance from friends outside the university to overcome these challenges.

Work Evaluation:

- **Efficiency:** I am pleased to report that my efficiency during this sprint was commendable. I was able to fulfill most of the project's objectives with minimal errors or unfinished tasks.

- **Quality of Work:** The final product meets the standards of satisfaction. Nevertheless, there is always room for further improvement.

- **Learning Experience:** The development of this project provided an enriching learning experience. I expanded my knowledge in various domains, including HTML, PHP, CSS, JavaScript, SQL databases, and networking. My ambition is to continue expanding my expertise in full-stack development and the utilization of APIs in future endeavors.

Conclusion:

In conclusion, this sprint allowed me to make significant progress in the development of the Task Management System. While there were challenges along the way, they served as valuable opportunities for growth and learning.

Appreciation:

I would like to express my heartfelt appreciation to Dr. Ahmad for entrusting me with this project. Your guidance and mentorship have been invaluable, and I look forward to continuing to learn and contribute to future projects under your leadership.

Thank you for this enriching experience.
